

TCS3200 color sensor module

Color sensor TCS230 TCS3200D color module /identification module/ color sensing PCB Board(white)

Adopts the original imported chip TCS3200 PCB board with gold plating process

TCS3200 is the upgrade version of TCS230, so it can achieve better results

Power supply 3-5v

Anti light interference

White LED, the on-and-off of the light is controllable

Detect the color of non-luminous object

PCB size: 24mm times 28.5mm
